Report Making - p5

- Add a custom visual so that it shows all product names and their revenue one by one in a rotating manner.
- Import a visual of your choice from store.
- Create a bookmark page with some filters to view that page later for use.
- Use the Q&A feature to build some visuals automatically.
- Use the text box to create a heading for the page.
- Use sync slicer to connect filter more than one page at the same time.
- Use key influencer feature to generate an automated report based on the fields we drop to analyze and explain.
- Use the decomposition tree feature to show break down of data based on a calculation.

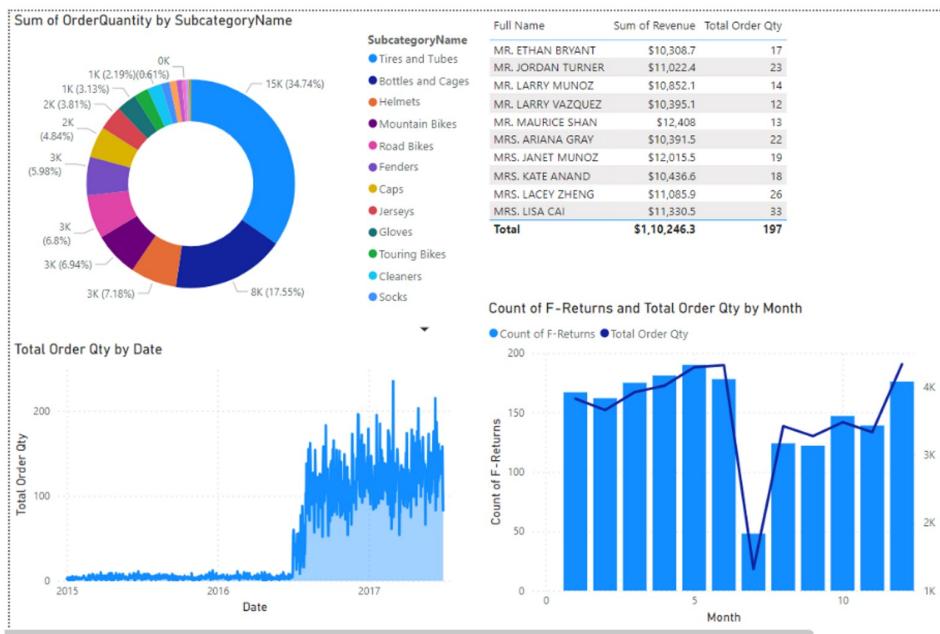

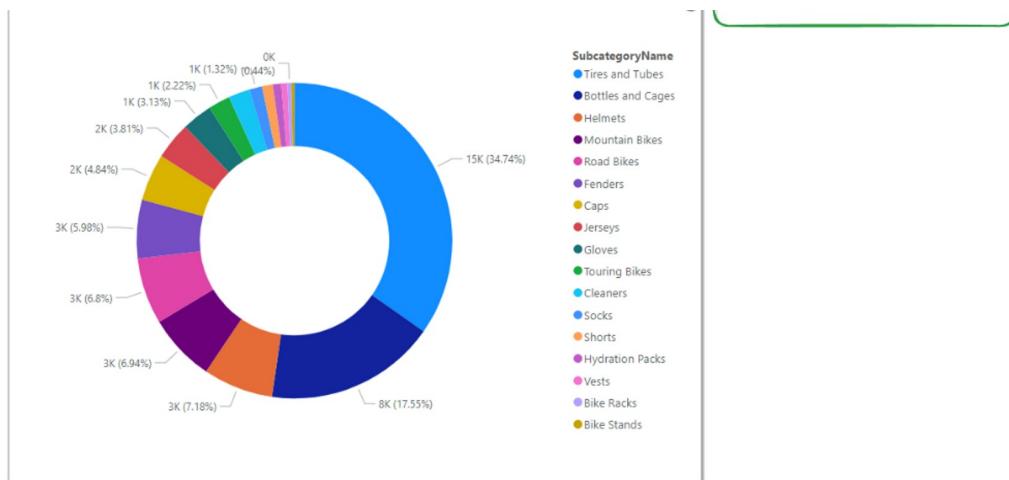

→ AI Visuals

A screenshot of a video player showing a course titled 'GOOGLE SHEETS BEGINNER TO ADVANCE'. It features a thumbnail of a man with glasses, a progress bar at 11 hours, and a 'Free' badge. Below the video player, there's a summary of the course: 'Showing results for Subcategory name and total order quantity as donut chart'.

→ Watch in 2x speed.

Qn4 - Apply the prompt.

Sync Slicer - >

Sync slicers ... >

Add and sync with all pages, or select specific pages:

Page name
Exec Dashboard
Product Details
Map
Page 1
Page 2
Q&A
Key Influencer

This column represent , complete dashboard gets updated without having any visuals of that slicer.

Where else you want to show that slicer on other layout.
